

EXPERIENCE LETTER

TO WHOMEVER IT MAY CONCERN

This is to certify that Mr. Akash PS has been an integral part of COPUBLICA from April 2024 as an AI Engineer(External).

Mr. Akash joined COPUBLICA and has since demonstrated exceptional skills in AI-related design, prompt engineering, and configuration with Large Language Models (LLMs). He has also worked on fine-tuning LLMs, as well as building agentic workflows. His work includes the development of Retrieval-Augmented Generation (RAG) systems to improve performance in knowledge-driven applications.

In addition to his AI expertise, Mr. Akash has played a key role in the frontend development using React.js, ensuring smooth integration of AI models within the user interface. Furthermore, he has contributed to the backend of our AI model infrastructure, utilizing both FastAPI and Django REST Framework to create robust, scalable solutions for AI deployment.

Throughout his tenure, Mr. Akash has consistently shown a high level of creativity, technical proficiency, and leadership in AI engineering. He is a problem solver with a deep understanding of AI model development, frontend-backend integration, and system optimization.

I highly recommend Mr. Akash for any role requiring expertise in AI engineering, prompt engineering, and LLM fine-tuning. His combination of technical skills, innovation, and adaptability will be valuable to any organization.

Please feel free to contact me if you have any other questions. I am confident he will bring tremendous value to any organization as he continues to build his career.

Best regards,

A handwritten signature in black ink, appearing to read "Brian Baptista".
